1) Take “app window” screenshots (key command: $\text{⌘} \text{⌘} 4$ then tap Spacebar) of plugins and then label and store these pics locally on your system.

Important! Keep these pics in a safe permanent location that will not change at a later date (I keep my pics uploaded and stored on my iCloud Drive). Any location change will break the location link in spreadsheet.

2) Right-click on the plugin pic and open it with a web browser so that the web browser generates a location link to the pic.

IMPORTANT!

Keep these pics in a safe (permanent) location that will not change at a later date.

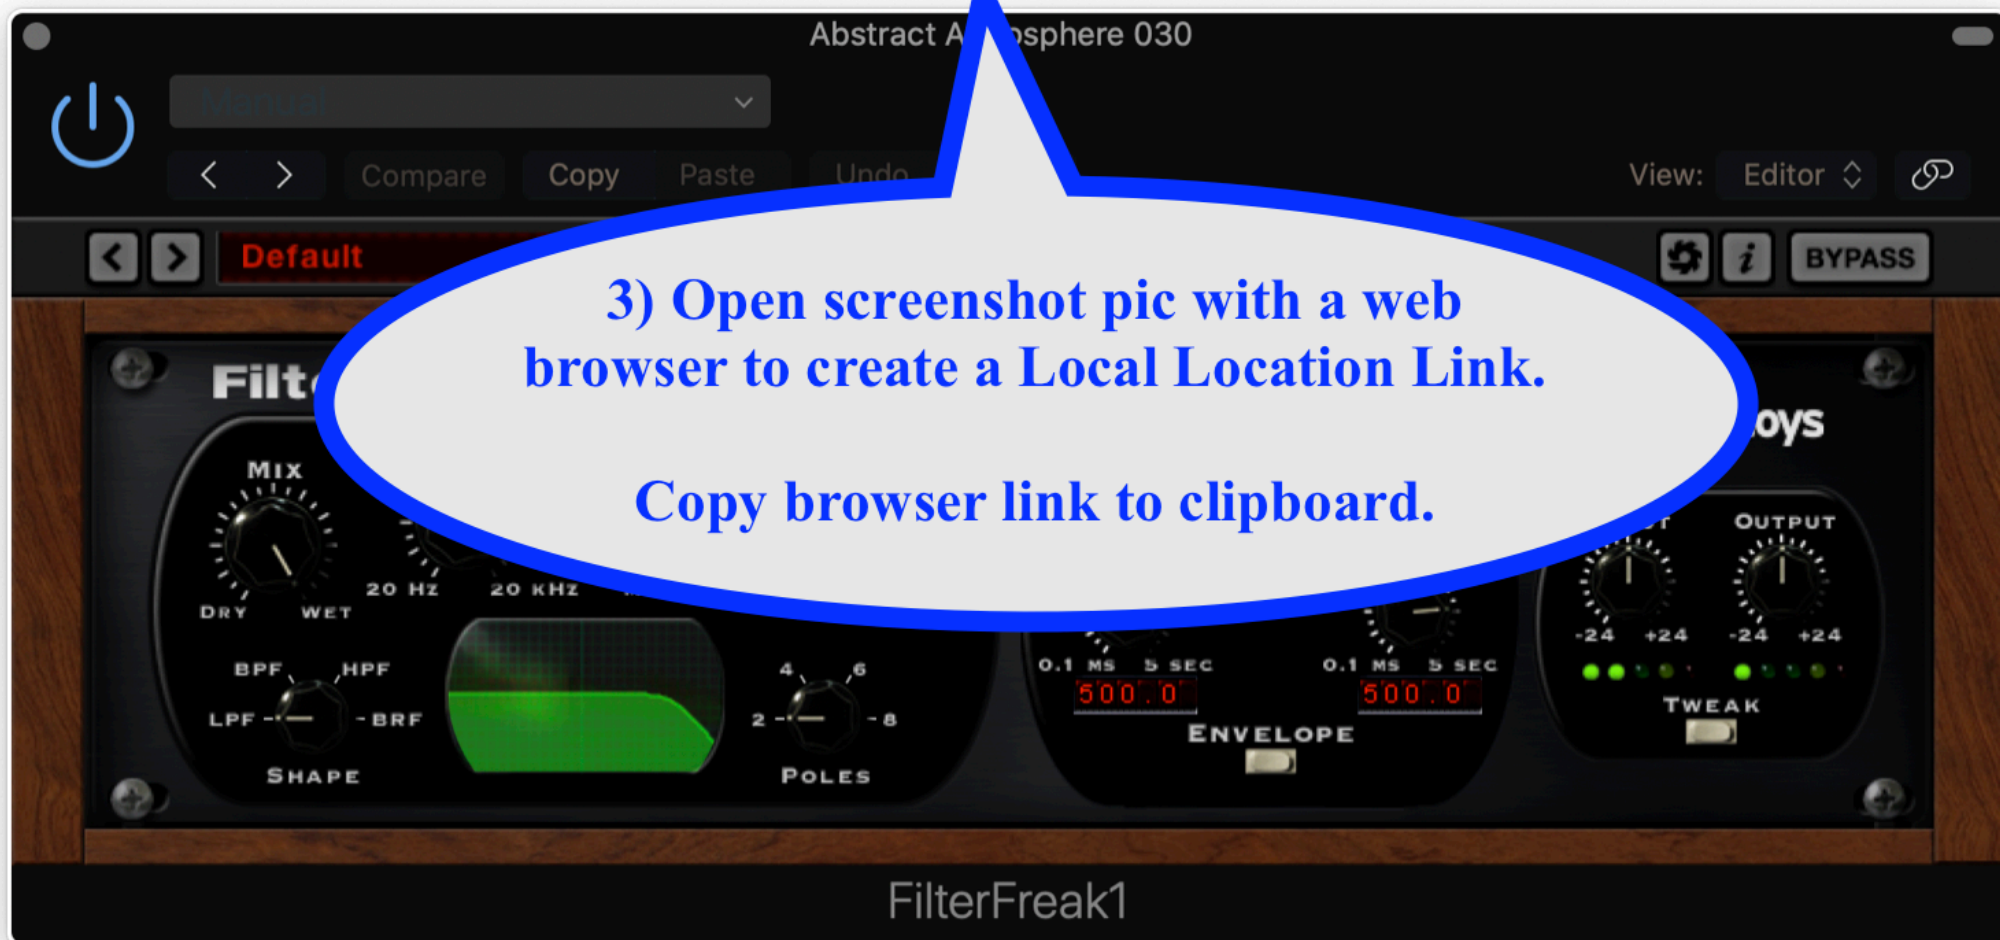

(e.g. I keep my plugin pics uploaded and stored on my iCloudDrive)

Any location change at a later date will break the current location link that you use in the spreadsheet.
